NOTICE OF JOB AVAILABILITY

TITLE: Assistant Professor

DUTIES: 80% research (Florida Agricultural Experiment Station) and 20% teaching (College of Agriculture and Life Sciences) responsibilities located at the Indian River Research and Education Center, Fort Pierce, FL. The appointee will accrue tenure in the Department of Horticultural Sciences (HOS), Institute of Food and Agricultural Sciences (IFAS), University of Florida. The appointee will develop an internationally recognized, extramurally funded research program with emphasis on: 1) plant root physiology and biology to improve root health and crop productivity; 2) development of environmentally sound and effective crop management methods that focus on the subterranean biotic and abiotic issues affecting root health, crop growth, and yields in Florida horticultural production, with emphasis on citrus. Opportunities exist to participate in interdisciplinary research teams that include specialists in horticultural production, plant pathology, entomology, soil and water science, and agricultural and biological engineering. The appointee will also develop a scholarly teaching program that develops and teaches innovative courses that contribute to the academic needs of the Department of Horticultural Sciences and have measurable impacts on student learning. Course instruction will use modern online delivery techniques that meet the UF Markers of Excellence for Teaching Online and Blended Courses. The successful candidate will participate in graduate education by chairing and serving on graduate committees, supervising thesis and dissertation research, and publishing research results with students. Because of the IFAS land-grant mission, all faculty are expected to be supportive of and engaged in all three mission areas—Research, Teaching, and Extension—regardless of the assignment split specified in the position description.

REQUIREMENTS: Ph.D. in Horticulture, Plant Science, or a closely related field. The candidate is expected to be well versed and have published in the field of plant root physiology and biology.

SALARY: $92,170.00/year
